

APRECITAS SAFETY

HIGH SAFETY CATALOGUE

protective equipment against falls from height
15 years of supply into Europe, Africa, Australia and the Americas

COMPANY INTRODUCTION

Aprecitas height safety manufacturing Co., Ltd., established in 2003, specializes in the manufacture, design and sale of various styles of safety harness, lanyards, self retracting lifelines, ratchet tie downs and slings. Our company has a complete quality and environmental management system, and our products have passed the EU certification, American standard certification, Australian certification and Canadian certification.

High quality product, manufactured to the client's design and specification under a strict and stringent 44 steps quality control. Providing our customers with high-quality safety products is our responsibility concept.

Manufactured to suit all price points with harnesses from US \$4 to US \$75 and tear webbing rated for 160kg worker.

Proudly made in China for the exacting markets of the Americas, Australia and Europe.

**protective equipment against falls from height
15 years of supply into Europe, Africa, Australia and the Americas**

We manufacture harnesses according your own design.

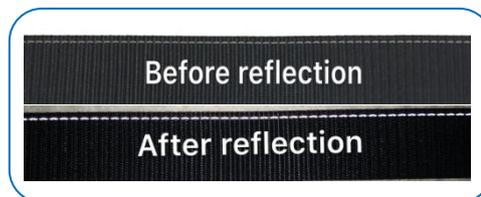

Available webbing colours for harnesses and lanyards:

others colours on request

Available options for harness and lanyard webbing:

Reflective Webbing

Water Repellent Webbing

Kevlar Webbing

Elastic Webbing

others colours on request

protective equipment against falls from height

SINGLE LANYARDS

-20-

FOR COMPLETE CODE ADD LANYARD AND HARDWARE CODE TOGETHER

Eg.: Single Adjustable Lanyard with 2 X SNAP HOOK = SLWLA1 + SNSN

Lanyards come in standard length of 2m, smaller sizes are available

SLWL01SNSN

SLWLA1SNSN

SLWLE1SNSD

SINGLE LANYARD HARDWARE

SNSD 1 X SNAP HOOK
1 X DOUBLE ACTION SCAFF HOOK

SNSD 2 X SNAP HOOK

protective equipment against falls from height
15 years of supply into Europe, Africa, Australia and the Americas

DOUBLE LANYARDS

-21-

FOR COMPLETE CODE ADD LANYARD AND HARDWARE CODE TOGETHER

Eg.: Double Adjustable Lanyard with 2 X SNAP HOOK = SLWLA2 + SNSN

Lanyards come in standard length of 2m, smaller sizes are available

SLWL02SNSN

SLWLA2SNSN

protective equipment against falls from height
15 years of supply into Europe, Africa, Australia and the Americas

DOUBLE LANYARDS

15 years of supply into Europe, Africa, Australia and the Americas

Ratchet Tie Down

-27-

SHXL02

Ratchet tie down is a fixed-function tool that is used in cargo transportation, removal, shipment and storage.

They have features of no slipping, safe, convenient and easy operation after they are locked tightly.

Material: Polyester

Standard: European standard EN19152-2

AS/NZS 4380

Length: According to customer's requirements

Temperature Range: -40°C ~ 100°C

Danger Coefficient: 2:1

Breaking strength	Webbing width	Total length	Total weight
5000kg	50mm	8m	2.9kg

ATTENTION:

1. Please just use ratchet tie down without broken and specification can be shown well on label.
2. Don't be overload.
3. Don't use webbing material with knotted.
4. Using sleeve to protect webbing material to keep away from the objects with sharp edges, and avoid abrasion and cuts.
5. Don't fix up ratchet tie down in knotted.
6. Don't put objects on ratchet tie down which will bring damages.
7. Ratchet tie down can't be used as load-lifting adjustment.

protective equipment against falls from height
15 years of supply into Europe, Africa, Australia and the Americas

Webbing sling

-28-

SHWSL

All endless polyester webbing sling are individually numbered and are fully traceable.

Every single webbing sling has labeled and certificated in accordance with the relevant standard together with information about safety use and maintenance.

Safety factor: 4:1, 5:1, 6:1, 7:1, 8:1 optional .

Material: 100% high tensile polyester

Length: 0.5M to 20M optional. special length may be upon request.

Color: Optional (purple, yellow, green, gray, red, amber, blue, orange).

Rated load: 1T-10T

Width: 20mm-300mm

Body ply: 1ply to 4plies

ATTENTION:

These slings are constructed in a double layer type and have black lines on the face of the webbing. The number of black lines on the webbing indicates the safe working load of the sling

- High flexibility and ease of handling
- Wider webbing for the same tonnage
- Less abrasion due to wider area of contact
- Longer life due to less wear and tear

protective equipment against falls from height
15 years of supply into Europe, Africa, Australia and the Americas

There are many other models not shown here.

We can design product as per your requirements.

An OEM partnership tailored to your needs.

Note that all products supplied into your region will be under relevant standards and normalisation by thirdparty certification eg CE, ANSI etc , for integrity and confidentiality purposes all certification is under OEM name and brand.
